

DESTRUCTION SERVICES

for Confidential Information in Any Form

Proper handling of confidential information is vital to you, your clients, and your business.

NAID “AAA” SECURED PROCESSING FACILITY

Our secure processing facility is equipped with 24-hour surveillance, access control, and 90-day video recording, and is subject to unannounced NAID audits. NAID-certified facilities require all personnel undergo rigorous background checks, including controlled substance, CORI, DMV, credit and criminal checks for your added security.

In addition, all our company vehicles are equipped with self-locking doors, alarms, and GPS tracking.

SECURE SERVICING FROM PICKUP TO DESTRUCTION

PAPER

Every business has sensitive documents that require proper destruction.

Recycling is not an adequate alternative to information destruction. Schedule pickups, on call services, one time purges or join our “All Shred” program. Eliminate the possibility of employees accidentally placing sensitive materials in recycling bins by placing all paper material in our secure locked containers so it can be securely collected and transported to our facility for shredding and recycling.

continued

HARD DRIVES & MEDIA

Even if a hard drive has been “wiped”, some data can be recovered by motivated thieves.

We will disassemble electronic components, recover and destroy the hard drives, and properly recycle the electronics. Call on us for destruction services including hard drives, thumb drives, printers/copiers, fax machines, cell phones, media tapes, CD's, medical equipment, x-rays, microfilm and more.

LOCAL GOVERNMENT

Deliver confidential material to our facility by appointment.

Our company works with local towns and municipalities to help them “Shred and Recycle.” We can also review waste streams and provide a detailed proposal to best address the cost-effective collection of sensitive material and recyclables.

OFF-SPEC PRODUCTS

In the wrong hands, off-spec or defective products can also be a severe liability.

Protect your brand's value by preventing off-spec products from making their way to market. No product is too big, or too small.

BADGES & PAYMENT CARDS

Unauthorized use of a badge or ID is the last thing a company or law enforcement unit wants.

Northeast Data Destruction has been repeatedly hired for badge and ID destruction by government agencies, local law enforcement, and for credit and gift card destruction by retailers and manufacturers. The clients can witness the destruction in person, and receive a Certificate of Destruction for each lot processed.

NORTHEAST DATA DESTRUCTION

provides secure confidential shredding of all your sensitive materials at our high capacity shredding facility.

+ Documents

+ Hard drives and media

+ Badges and Payment cards

+ Off-spec products and more
